

LSB INSURANCE

AUTO RECYCLING AND DISMANTLING INSURANCE

LSB Financial brings you the best in business insurance for your Auto Recycling and Auto Dismantling operation. The auto recycling and dismantling industry has changed greatly in the last decade from being a local yard that serviced the local community to a business that can use the web to service the country. Has your business insurance and risk management program changed with your business?

At LSB Financial we understand the exposures you face in the auto dismantling and recycling industry whether you still service your local community or sell strictly off the internet. We use our experience to make sure you are covering or transferring risk on towing, pulling, storing, selling and crushing used autos.

The LSB Financial team and your staff will create a risk program that fits your individual needs and supplements where you are looking for help. We not only work to help your insurance budget but also assist with compliance and safety issues because, in the long run, it all affects your bottom line.

Contact LSB Financial for more complete information about Auto Recycling Insurance for your dismantling and recycling business.

Safety Audits & Loss Prevention Site Inspections

Written materials alone don't accomplish safety on the job. Work areas should be inspected on an ongoing basis so that supervisors and employees know that the company has made a commitment to safety that is being monitored and enforced.

LSB Financial will conduct safety compliance assessments for corporate facilities or construction sites. This assessment will include several investigative efforts including workers compensation document analysis, on-site inspection, interviews with on-site staff, and a review of corporate operations and compliance documents.

Once the physical location assessment is conducted a follow-up report is generated identifying each observed violation or potential violation, appropriate Standard, Regulation or Section of the Act violated and suggested solutions.

Key Benefits

- Identify Risk
- Determine regulatory Violations
- Provides a Basis for Determining Safety Program & Training Requirements

Employee Safety Training

A critical component of regulatory compliance is meeting the statutory obligations of employee safety training. LSB Financial has professionally trained staff, which can provide your company with necessary training courses and knowledge to understand and maintain compliance.

LSB Financial will provide employee safety training on many different compliance topics. Sessions are scheduled as to not interfere with production. Individual instruction plans will be developed for each topic with your industry specific application of safety principles and practices.

Topic specific printed materials such as handouts will be supplied for each course. Documentation of course understanding through employee testing and attendance records for in-house evidence of training are included with the session. Our instructors are professionally trained and experienced to provide your company with employee training to achieve results. LSB Financial accomplishes your training needs.

Key Benefits

- Flexible to cover after hour sessions
- Experienced trainers
- Special emphasis for target employee groups
